DETAILED ACTION

Claims 1-32 are pending in this application.

Information Disclosure Statement

Applicant's information disclosure statement (IDS), filed on 06/01/2004 has been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on Application number 10300123.9 filed in Germany on 01/07/2003, which papers have been placed of record in the file. The application names an inventor or inventors named in the prior application.

Response to Election/Restrictions

Applicant's election *without traverse* of Group I in the reply filed on 12/27/2004 is acknowledged.

Examiner's Amendment

Reasons for Allowance

The present invention is directed to a process for preparing pyrazolylarylalkine

compounds of formula (I), . The closest prior art of record is in the Journal of the Chemical Society, Perkin Trans. 1, 1999, 3713-3720 (Tretyakov et al.), which teaches a similar process of preparing pyrazolylarylalkine compounds. The difference is that in the instant application, the starting material (pyrazole) undergoes a substitution reaction with a palladium catalyst, followed by an elimination reaction, followed by halogenation, followed by an elimination reaction to yield the product. The prior art of Tretyakov teaches a process where the starting material (pyrazole) undergoes a substitution reaction with a palladium catalyst to yield the product (see Scheme 3 on p. 3715).
